

Job Description

Amdale Limited is seeking a Sales / Planning engineer to promote and develop our latest investment in 5-axis CNC milling and turning

Primary responsibilities would include:

- generation of new sales leads for machined parts
- preparation of tenders and enquiries to customer specifications
- planning and costing through to quotation
- customer liaison

Amdale Limited, based in Portsmouth, Hampshire, has an enviable reputation as a high-quality, reliable supplier for technically demanding industries including Formula One, Aerospace and Medical. The machining department, equipped with the latest DMG machining centres, is supported by first class inspection facilities.

The company's goal for the next period is continued growth through the automation of the machine shop, and increase the capacity of the CNC turning department with new machinery

With a current quality system recently up-graded to AS9100, we are looking to increase our sales within aerospace, as well as further expansion into the Oil and Gas industries.

Personal Qualities

You will need to have a vibrant personality and be a strong team player, ideally with a background in engineering or with a relevant degree. You need to have a good knowledge of both CAM-based programming systems and the latest machining strategies.

The successful applicant will need to be capable of managing and motivating a sales team to achieve sales targets. They will also have strong organizational abilities, good spoken and written communication skills and an ambitious approach to their job.
